

Factsheet

BiblioCheck 6

BiblioCheck 6 is the software that runs on Nedap's newest service stations. It offers an easy to use interface for customer and librarians to check-in, check-out and renew library items. BiblioCheck reports back to your own LMS over a SIP or NCIP connection. BiblioCheck 6 is available in different editions; Self Service, Conversion, Intelligent Shelving or Monitor.

Description

This version of BiblioCheck 6 brings libraries a new, easy-to-use interface and a cleaner, faster code. Updates with new functionalities will be released regularly and can be downloaded at the Nedap partner portal.

BiblioCheck 6 communicates directly with the RFID reader, the ticket printer and any other hardware installed in the Nedap's service stations. It has a range of configuration options related to the GUI and devices connected to the system.

Self Service

BiblioCheck 6 Self Service is the software that runs on Nedap's newest service stations. It offers an easy to use interface for customer and librarians to check-in, check-out and renew library items. BiblioCheck reports back to your own LMS over a SIP or NCIP connection. BiblioCheck 6 is available in a Self Service and Intelligent Shelving edition.

Intelligent Shelving

BiblioCheck 6 Intelligent Shelving features the automatic check-in of books by just putting them on a shelf. New customers will be told on which shelf they can find a certain book. The intelligent shelving solutions even allow CD's, DVD's and reserved media to be returned through a separate, closable shelf.
